

Transforming Your Mobile Workstyle™

## Super Compact PC for the Mobile Professional

**The PC for today's mobile workstyle.** FlipStart® is a sleek, super compact PC with a form factor that really works for the mobile professional. Its familiar clamshell design is packed with innovative features that make it easy to use — in your hand, on your desk or mounted in your vehicle.

### The productivity of a PC

FlipStart offers the capabilities you expect from your laptop — comfortable application usage, communications, entertainment and Internet connectivity. Its industry-standard components include an Intel® Pentium® M Ultra Low Voltage platform, 1.1 GHz of processing power and a 30-GB hard drive with the choice of Windows® XP Professional or Windows Vista® Business operating systems.

### Familiar form factor

The clamshell design is immediately familiar to laptop users. With the adjustable screen angle, balanced weight, dual-function keyboard and high-resolution 5.6" display, FlipStart is comfortable in your hands, on your desk or mounted in your car. In addition, the QWERTY keyboard, touchpad and touchstick provide easy navigation, while the 1024 x 600 wide SVGA display provides comfortable screen viewing.

### Easy access

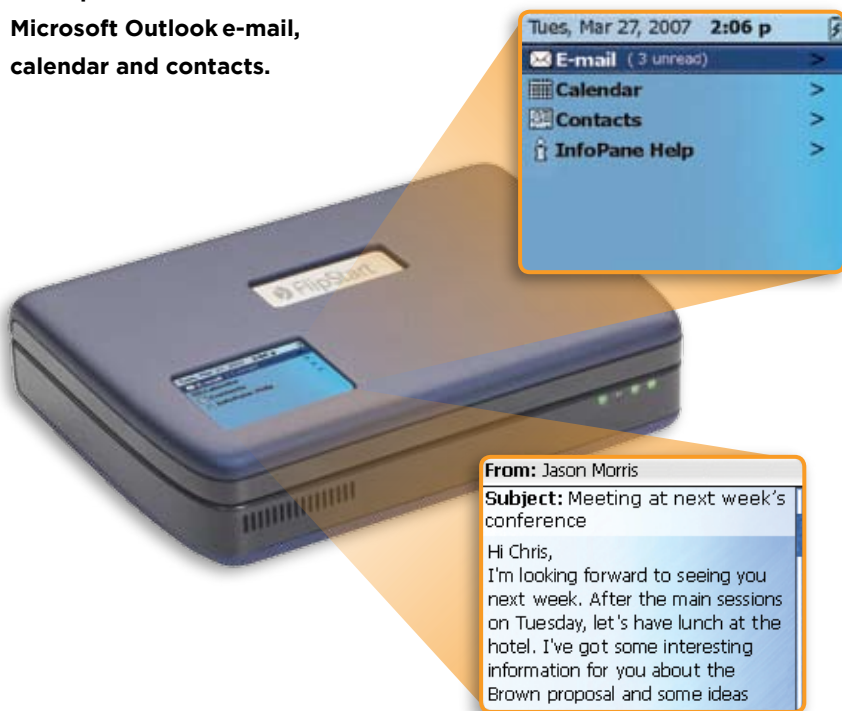

The FlipStart InfoPane™ provides a low-power interactive display on the outside of the case, giving you instant access to daily details in Microsoft® Outlook® e-mail, calendar and contacts. When open, the FlipStart Navigator™ provides a fully customizable shortcut menu for one-button access to the applications, files and systems that you access most. The nine-level FlipStart Zoom™ allows you to quickly drill down on a screen or window for more detail.

### Straightforward connectivity

Every FlipStart is equipped to run on the Sprint® Mobile Broadband Network — the nation's largest mobile broadband network. FlipStart also offers Rev A technology, so users get faster upload and download speeds where Rev A is available. In addition, FlipStart provides 802.11b/g functionality, so you can access office, home and public Wi-Fi networks. Connectivity to wireless peripherals, such as keyboards, mice, headsets and others, is achieved with Bluetooth® wireless technology. Moreover, FlipStart includes a slim, removable port replicator to provide VGA output for projectors and large monitors, Ethernet, additional USB ports and audio line output.

The FlipStart InfoPane provides a low-power external view of Microsoft Outlook e-mail, calendar and contacts.

### IT-friendly

FlipStart runs a familiar operating system and utilizes industry-standard components, which means it fits easily into any existing IT infrastructure — with no additional support. And with built-in security, FlipStart users have safe, seamless access to all the applications and data they need to keep business well in hand.

### FlipStart Labs: Empowering the Mobile Revolution

FlipStart is the first commercial product offering from FlipStart Labs, a technology incubator created to evolve mobile personal computer technologies. Funded by Microsoft co-founder Paul G. Allen, FlipStart Labs is leading the way to the future of personal computing technology through extensive customer research and the drive to create innovative technology products. FlipStart Labs is dedicated to creating revolutionary devices that enable effortless, uncompromised mobile computing.

## Specifications

### Processor

- 1.1 GHz Intel® Pentium® M Processor Ultra Low Voltage

### Graphics

- Intel® Enhanced Graphics processor

### Hard Drive

- 30 GB (shock-mounted)

### Memory

- RAM: 512 MB DDR2

### Operating Systems

- Windows® XP Professional
- Windows Vista® Business

### Dimensions

- Size
  - 5.9" x 4.5" x 1.35" with slimline battery
  - 5.9" x 4.5" x 1.6" with standard high-capacity battery
- Weight
  - 1.5 lbs. with slimline battery
  - 1.75 lbs. with standard high-capacity battery

### Inputs

- Backlit QWERTY keyboard
- Mouse buttons
- Touchpad
- Touchstick
- Jog dial

### External Display

- Size: 1.8"
- Resolution: 220 x 176

### Display

- Size: 5.6"
- Resolution: 1024 x 600 Wide SVGA

### Connectivity

- Sprint® Mobile Broadband Network ready — EV-DO Rev A
- Wi-Fi 802.11b/g
- Bluetooth® wireless technology

### Audio

- 3.5-mm stereo headphone
- Dual built-in microphones
- Built-in speaker

### Camera

- Internal VGA camera

### Lithium Polymer Battery Life

(depending on usage)

- Standard high-capacity: 3-6 hours
- Slimline: 1-3 hours

### Ports

- USB 2.0
- Power input
- Port replicator connector

### Port Replicator

- VGA output
- Audio line output
- 10/100 Ethernet port
- Two USB 2.0 ports
- Power input

### Basic FlipStart Package Includes

- FlipStart PC
- Standard high-capacity battery
- Stereo ear buds/microphone
- Soft carrying case
- AC adapter
- Port replicator
- Screen polishing cloth
